

LAC Digital Citizen

idLAC – Regional
Digital Identity
Broker for Latin
America and the
Caribbean

XIX REUNIÓN INTERAMERICANA
de Gobierno Digital

The Regional Context

Why is digital identity interoperability needed in Latin America and the Caribbean?

The Regional Context

Why is digital identity interoperability needed in Latin America and the Caribbean?

High regional mobility
(work, education, migration, trade).

The Regional Context

Why is digital identity interoperability needed in Latin America and the Caribbean?

High regional mobility
(work, education, migration, trade).

Digital public services limited to national citizens

The Regional Context

Why is digital identity interoperability needed in Latin America and the Caribbean?

High regional mobility
(work, education, migration, trade).

Digital public services limited to national citizens

Fragmented identity ecosystems.

The Regional Context

Why is digital identity interoperability needed in Latin America and the Caribbean?

High regional mobility
(work, education, migration, trade).

Digital public services limited to national citizens

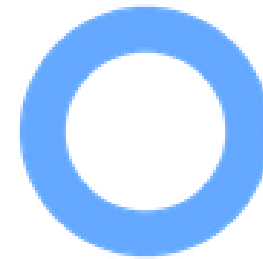

Fragmented identity ecosystems.

Need for trusted cross-border authentication.

The Problem

Why bilateral integration between countries does not scale.

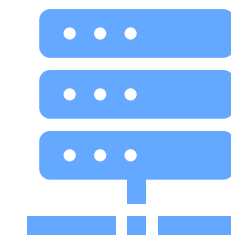

Different identity systems.

High cost of integrations.

Different legal frameworks.

Limited cross-border services.

The Solution: idLAC

Cross-Border Digital Services

Digital Identity

Digital Signature

Interoperability

How the Broker Works

The hub-and-spoke model.

Service Providers (SP).

Identity Providers (IdP).

idLAC Broker in the middle.

The broker acts as a trust intermediary between identity providers and services.

Key Capabilities of idLAC

Open-source digital public good.

Federated identity.

Sovereignty preserved
(credentials stay in origin
country).

Single Sign-On across borders.

Traceability of authentication.

Cloud or on-premise deployment.

Current Status of the Project

idLAC has moved from concept to MVP.

1

Functional broker.

2

Integration with multiple countries.

3

Live demonstrations.

4

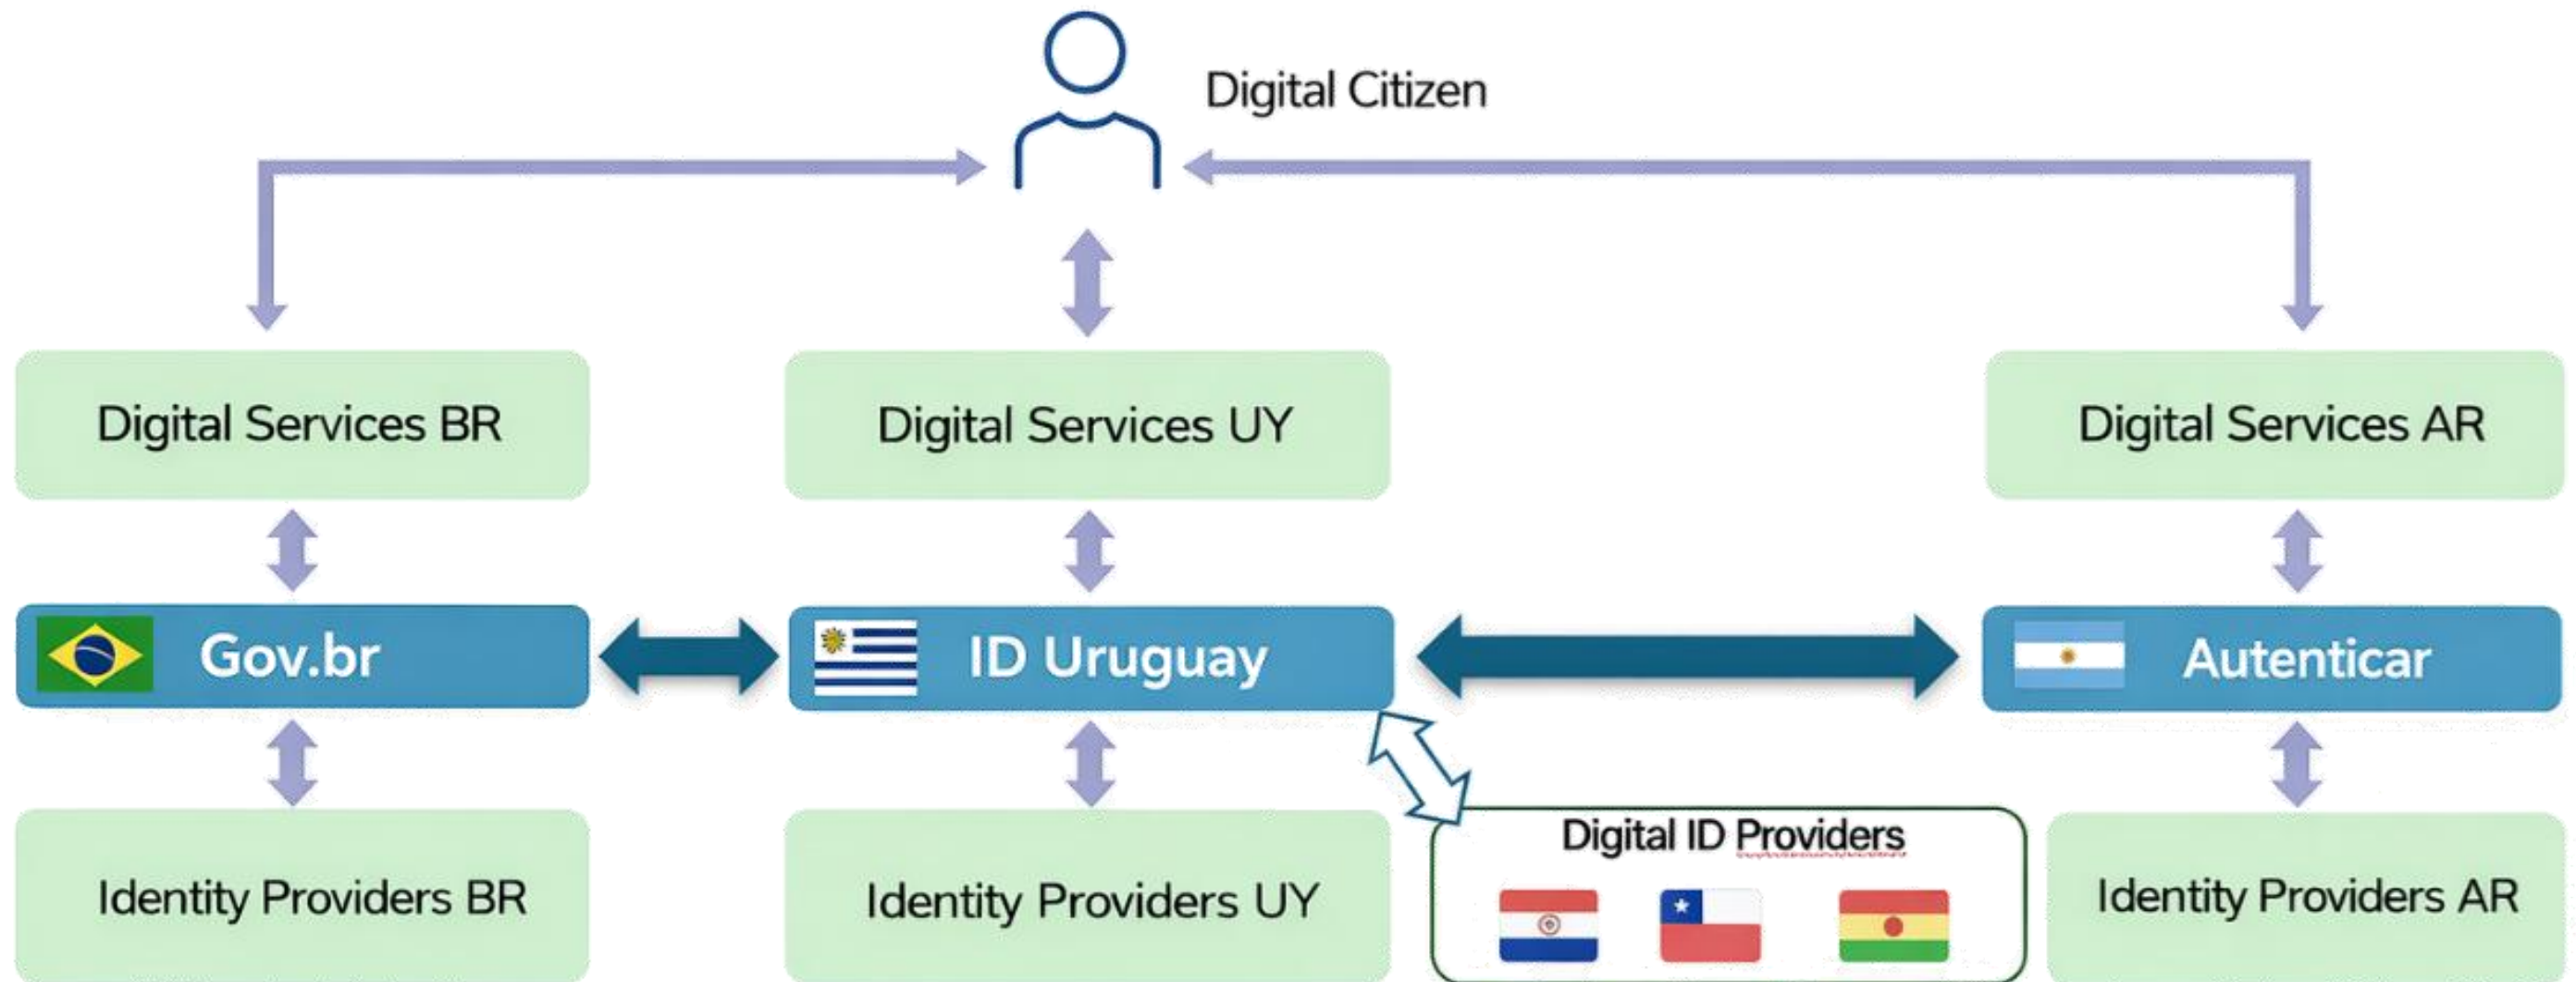

Technical validation.

5

Initial security assessments.
